BEEKEEPER

INNOVATION APP

The future starts with new ideas. Source the best from your business.

What is the Innovation App?

The Innovation App is a forum that lets employees share and vote on ideas, helping you create full transparency on new initiatives, event suggestions and competition submissions. Employees post their ideas in a stream and allocate voting points in the app.

Source and rate ideas quickly and easily, with no need for meetings. Take action on the most popular ideas submitted each month via the Beekeeper Innovation App on mobile and web.

Foster innovation
Get everyone engaged with idea crowdsourcing via Beekeeper

Reward employees
Vote for the top idea every month and reward the winning employee

Value their insight
Encourage employees to share ideas, innovations and suggestions

Take action on the most popular input from the people who know your business best - your workforce. Your employees can easily and transparently submit ideas, vote for their favourite and determine a winner.

5 steps to innovation crowdsourcing

1. Install the Innovation App and set up Innovation Streams. The app appears to all users with access to the Innovation Streams as a Navigation Extension

2. Get everyone motivated for the first voting round!

3. Employees post their ideas on the streams. The streams sync to the Innovation App

4. Access the app and allocate points to the best ideas. You can reallocate your points between ideas until the voting round closes

5. The app posts the results of voting at the end of the round and reposts the top-voted idea to the streams
